

Information Campaign to the population & elected representatives

Dear Ladies and Gentlemen

It is up to all of you to circulate this document to your elected representatives and request the delivery receipt of the file application*

In France, we circulated this document to most of our elected representatives and created many contacts. We are now sending letters to all the french jurisdictions.

It is up to you to organize yourselves in your own country in any way you see fit and independently from any kind of authority.

We know, the world is upside down.

The population, aware of the dangerousness of the international accounting standards, must inform their mayors and other representatives in their surrounding area as well as their fellows.

So, how did we get into this mess ?

Because we realized that the representatives, the mayors in particular, knowing that most of them are in lack of financial means, have not been aware of this situation.

Within the limits of your volunteer work, you are requested to bring this issue (study + popularisation summary + delivery receipt of the file application*) to your town hall, county representatives and other public institutions you may think of, in paper format because most of the representatives don't go online.

Indeed, it is a lot of paper work but it is fundamental for getting the message through to your elected representatives.

You are the actors of change !

Disseminate without moderation.
