

"France, Pedoland under the 4th Freemasonic Reich",
to each his own judgement.

campinfors.heb3.org

We have just posted on our website a complaint lodged with the Paris Freemason Court.

A whistleblower, whom we brought up on the institutional mobbing complaint, in the context of corruption cases she is handling on French soil and concerning paedophilia, has just given us the go-ahead to make this complaint public. This has very long for us to get this agreement.

Given that the entire team working on this "Economic Genocide of Nations" dossier is being tapped on French soil, and that some of them are being censored both by telephone and by Internet, and that despite the complaint that has been lodged with the Lyon (french big town) Public Prosecutor's Office in this regard, the French justice system obviously considers it normal for our telephone lines are hijacked and this on evidence.

Since this complaint, which we filed in this way and which is available on the website, was deemed inadmissible by the Lyon public prosecutor's office, the French justice system, it is therefore perfectly normal for the French justice system to be in total contradiction with French law.

The case was brought before the Freemason Court in Paris. What many French people don't know is that France does indeed have a Freemasonic court...

Note that the complaint dates from 2020.

Note that this complaint refers to the Toronto Accords, agreements one of whose aims is to recover parental authority over children and give it to a state entity.....

Because children should be the property of the government.....

Question: what the hell is Freemasonry doing...???

We are in 2022 and the complaint dates back to 2020.

In '45 under Nuremberg, when the SS were asked why you did it? Their answer was "it was orders".

Now they won't be able to say "we didn't know it was orders"

Freemasonry, which prides itself on words such as liberté, equality, fraternity.....

There's something I don't understand...

For the record.

When this miss made this complaint, which we transferred via our networks throughout the world.

I was saying when this complaint was made...

The young woman, who had been close to Beregovoy during her childhood, was contacted by one of the Grand Masters of the Grand Orient de France.

He was convinced that she had made the complaint in order to join Freemasonry...

She burst out laughing and replied: "Absolutely not. My aim is to prove that corruption is widespread in this sect".....

It's no secret in France that the country's administrations are run by Freemasonry.

But for the bodies attached to this sect to allow such a complaint to go through, calling into question a huge number of things, including the fact that they have the right to regain parental authority over our children...

Today we can say that France is run entirely by Freemasonry...

At the same time, when the global sovereign standard, which is the chart of accounts, makes you a debt, globally, in the eyes of the system. And this standard is pyramid-shaped.....

There are questions to be asked here too...

All the more so as all you have to do is change the place of man in the accounting plan, and the pyramid breaks down, and we naturally move to a holistic economy.....

This article was covered by Profession Gendarme, whom we would like to thank:

Shh, we're being genocided and it's worldwide.

Here are a few extracts from this complaint with annotations, which will let you appreciate the fairness of our democracy:

Extract

"There is nothing unusual, then, in the fact that 6 years later the Toronto Protocol was drafted, which stipulates "(...) This is why child protection agencies must be vested with absolute legal authority. They must be able, as they see fit, but always under the pretext of child protection, to remove these children from their original family environment and place them in foreign family environments or government centres already committed to our principles (...) For without the protection and supervision of their original parents, these children may be permanently handicapped in their psychological and moral development (...).) For such an undertaking to succeed, it is essential that the civil servants working in these government offices have no previous experience, are imbued with theories that we know to be empty and ineffective and, above all, are obsessed with the missionary spirit of great protectors of endangered children. For them, all parents must be potential criminals (...) "Toronto Protocol 1967".

The Toronto Accords apply to all countries attached to the IMF International Monetary Fund.

Extract

"Since, the President of the Court of Auditors, the late Philippe SEGUIN concluded on an investigation carried out in 3 departments, published in the form of a public report in 2009, that child placements are the door open to the greatest French corruption. That the Children's Judge Jean-Pierre ROSENCZWEIG, for his part, estimated in 2004 this childhood market at 5.34 billion Euros. Each child placed in care cost the community €72,000/year in 2008: nearly 10 billion euros will be invested this year.

These figures are confirmed by young Lyes LOUFFOK in his book The Hell of Homes (L'enfer des foyers), in which he explains that there are more than 400,000 children in care in France bringing in 189 euros per day per child.

Which implies that the placement of a child brings in at least 1 million euros.

French child protection thus generates, as previously stated, an expenditure of 10 billion euros per year.

The financial stakes are therefore considerable. But where the problem lies is that, according to the very admission of Senator NAVES INSPECTOR GENERAL OF SOCIAL ACTION, 70% of children placed in France are placed for no valid and legal reason, he will report this crime for the first time on June 7, 2007 in the television program Envoyé Spécial, broadcast on France 2.

Worse still, Ségolène ROYAL (Former Minister of Family) indicates in one of her draft laws that more than 2/3 of children placed in care are there for financial reasons, "that their parents love them, and do not mistreat them ".

However, a placement cannot legally be based on the financial means of the family, any more than on a parental conflict, which does not endanger either the psychology or the identity of the child, but which turns out to be the other major motivation for arguing investment decisions.

Thus, the existence of annual forecast objectives of the order of 10% increase to 20% during presidential election years raises questions, as does the placement rate, calculated in proportion to the department's debt rate. ? »

"Progress, to see the people of France in flames and blood, as they were in 1789? And as at the time, since he is starving and complains about it, his eyes are gouged out, and this, in the name of social peace, which again only concerns fraternity.

Oh it is of course forbidden to wage war against Freemasonry.

But if the beggars kill each other, this is also a fantastic benefit for the congregation, since the deaths which will occur, from this civil war, which high Freemasonry is trying to foment, would constitute a real bomb. to finance, fueling organ trafficking, which let's admit it, is a more than flourishing sector in France, currently there is the KABILE affair. »

Kabile affair which took place following a complaint from Mr. Kabile concerning his mother, who never came out alive following her entry into hospital.

Note that behind this affair, a senior official had been singled out, by the name of Jean Maya, an official who we find in the position of secretary general of the French constitutional council.

Extract

"That with regard to this notion, Madame Camille XXXXX and Madame Sandrine XXXX, sisters of the Mozart lodge, violated on the one hand the contradictory and on the other hand forced the applicant's son to go to his incestuous father Mr. XXXXX, himself a victim of the GLENCROSS network, where an incalculable number of French and English Freemasons practiced sexual abuse on minors."

Network that goes back to Ms. Claude and François Mitterrand.

We would like to take this opportunity to say hello to the author of this Complaint to the Freemasonry Tribunal, Edwige XXXXX, since since February 22, 2021, we have never been able to get in touch directly with her, either by internet or by telephone. .

Finally, we also take advantage of this article to announce to you that African countries have taken up the Economic Genocide of Nations file.

On this subject we thank Mr. Kémi Séba who, in one of his multiple interviews, asked Africans on French soil to join the French resistance.

The fight regarding this corruption issue is above all global, beyond all religious, social class and racial divides.

All complaints are accessible, as well as the Economic Genocide of Nations, can be downloaded in pdf format, on this site, in the complaints tab:
